

ANDREI CHIRITA

FULL-STACK WEB DEVELOPER

✉ andreidchirita@gmail.com 🌐 andreichirita.com ☎ 2895000161 in adchirita 🎤 Pitching

SUMMARY

I am a Full-stack web developer with a passion for programming and computer software & hardware. I have a strong background in software testing and am familiar with automation testing using Python and Selenium. Worked closely with professional developers during the software development lifecycle, I am able to work well in a waterfall or agile environment according to the project's needs.

SKILLS

LANGUAGES: JavaScript, Ruby, HTML, CSS, Python, C++, C#

FRAMEWORKS, LIBRARIES & ENVIRONMENTS: NodeJS, ReactJS, Ajax, Express, EJS, jQuery, Bootstrap, ActiveRecord, React Native, Ruby on Rails, SASS, TypeScript

TESTING: Storybook, Cypress, RSpec, Jest, Mocha & Chai, Selenium

SYSTEMS AND DATABASES: SQL, Git, MongoDB, Kubernetes, Docker

EMPLOYMENT

Miipe Inc, Sr. QA Analyst, Vaughan, ON

June 2019 - Oct. 2021

- Was the main tester for one of Bell's top 3 projects in 2020. Joining their largest database Maximo with their new router line. Tested the functionality of new devices being set up with newly built in-house technician software. Chosen as the main tester due to my strict attention to detail and simplicity of test cases, allowing simpler collaboration between the business and the QA Team.
- Extensive experience with defect tracking software such as Jira and Redmine
- Use of SoapUI, Postman and Puppeteer to inject test scenarios and automate submissions
- Received exposure to test case automation with the use of Python and Selenium, as well as Kubernetes and Docker
- Taken part in numerous testing lifecycles such as End-to-End, User Acceptance Testing, and Regression Testing. Testing was executed on various Bell web and cloud systems such as their alarm tracking software, Maximo database, ticket creation and management software

PROJECTS

Website Portfolio

A website I designed for myself to showcase my skills and front-end capabilities, including projects and contact information.

Tech stack:

React, SASS, React-Router, Bootstrap, Animate on Scroll, Typewriter

Adventure Scribe

An app that is used to create and take notes on a map layout for tabletop gaming (games like D&D, Pathfinder, etc.) using leaflet and a psql database to keep track of users and notes.

Tech Stack:

React, Express, ReactJS, PSQl, Leaflet, CSS

Interview Scheduler

Project using React and an API database to update real time actions taken by the user to book, edit, and delete appointments with a set list of interviewers per day.

Tech Stack:

Axios, Classnames, Storybook, CSS, SASS, React, Cypress, Jest, React-hooks testing library, Javascript, HTML

Bazar

An app designed to work as a website for posting/listing/selling items much like Kijiji. Displays item details and allows item owner to delete and mark items as sold.

Tech Stack:

NodeJS, PG, Express, Javascript, HTML, CSS, API

Tweeter

A twitter clone project designed to create tweets per the user input and display them on the page in real-time.

Tech Stack:

Express, NodeJS, Chance, AJAX, Javascript, HTML/CSS, SASS

EDUCATION

Lighthouse Labs

Diploma Full-stack Web Development 2022

Sept. 2022 - Dec. 2022

Seneca College School of Electronics & Mechanical Engineering Technology

Advanced Diploma Computer Engineering Technology 2019

Sept. 2015 - Sept. 2019
